

Opening Form – Form Opens in Browser, Displays “Please Wait...”

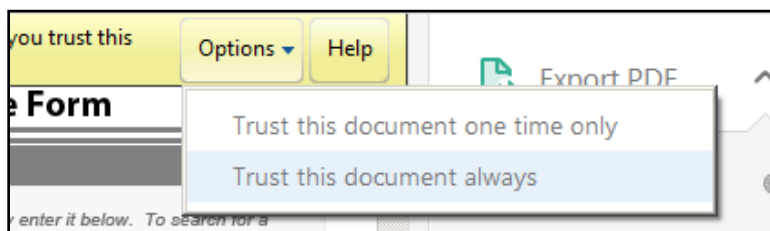

If you click on the link to the form and receive the above message in your browser, you should return to the page with the link and right-click on it. Choose “Save Target As...” or “Save Link As...” and download PDF to your computer. Open the PDF with Adobe Acrobat or Adobe Reader. Web browsers cannot properly view the form on their own.

Warnings when Using the Address Lookup or Submitting the Form

Modern PDF viewers, such as Acrobat and Reader, have security precautions built into them to prevent you from accidentally connecting to malicious computers on the internet. You will see a warning appear the first time you click “Lookup parcel details” or attempt to submit the form. The warning will consist of a pop-up message and a yellow bar at the top of your PDF, as shown here:

This is completely normal. Click “OK” to dismiss the pop-up, then click “Options” in the yellow bar and select “Trust this document always”.

Adobe Acrobat/Reader will attempt to close and reopen the PDF. It will ask you to save the existing PDF as a new copy. Once you save and reopen the PDF, the connections to the NH DRA server for the Address Lookup and the form submission will be functional.
