

Revised 8/14/14

2013 COMPARISON OF FULL VALUE TAX RATES

The full value tax rate represents the estimated tax rate for a municipality if all the taxable property was assessed at 100% and includes the equalized value of properties for which a payment in lieu of property taxes is made.

The full value tax rate is calculated as follows: The 2013 gross local property taxes to be raised as reported by the Department of Revenue Administration, Municipal & Property Division divided by the total equalized valuation including utility values and equalized railroad taxes.

The full value rates are ranked in ascending order from lowest to highest (1-227 for 2013). If two municipalities have the same full value tax rate they are ranked with the same number. The unincorporated towns (signified by ****) have no 2013 tax rate, and thus are not ranked.

The full value tax rate can only be used to make a limited comparison of what a property in one municipality would pay for taxes to a property of equal value in another municipality.

For example:	Town A	$\frac{100,000 \times 21.95}{1000} =$	\$2,195.00
	Town B	$\frac{100,000 \times 26.56}{1000} =$	\$2,656.00

Due to diverse real estate values in New Hampshire, properties of equal value do not equate to properties of equal size or quality.

Prior to making any assumptions or decisions regarding a property owner's tax burden in a municipality, other factors should be considered such as real estate values, municipal services, schools, community make-up, and locational factors including proximity to urban areas, medical facilities, highways, recreation areas, etc.
