(c) The percentage of the total sales, including charges for services, made by the business organization everywhere as is made by it within this state. Sales of tangible personal property are made in this state if the property is delivered or shipped to a purchaser, other than the United States government, within this state regardless of f.o.b. point or other conditions of sale, or the property is shipped from an office, store, warehouse, factory or other place of storage in this state and (1) the purchaser is the United States government, or (2) the business organization is not taxable in the state of the purchaser. Sales other than sales of tangible personal property are in this state if the income-producing activity is performed in this state, or the income-producing activity is performed both in and outside this state and a greater proportion of the income-producing activity is performed in this state than in any other state, based on costs of performance.
